COPYRIGHT STATEMENT

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

SECURITIES AND EXCHANGE COMMISSION

SURVEY OF AMERICAN LISTED CORPORATIONS

This project has as its objective a series of compilations which would make more readily available some of the information filed with the Securities and Exchange Commission. The Survey has compiled data contained in registration statements and reports filed annually by registrants under the Securities Exchange Act of 1934, the Securities Act of 1933, and the Investment Company Act of 1940.

The Survey includes only those companies which have securities listed and registered on National Securities Exchanges under the Securities Exchange Act of 1934 or which are required to file annual reports under the Securities Act of 1933 and management investment companies filing under the Investment Company Act of 1940. Certain types of enterprises registering securities with the Securities and Exchange Commission but which are, nevertheless, not covered include: Carriers reporting to the Interstate Commerce Commission; communication companies reporting to the Federal Communications Commission; insurance companies; banks and trust companies; bank holding companies; bondholders' protective committees; investment companies issuing face-amount and periodic payment plan certificates; and foreign issuers other than North American, Cuban and Philippine.

The results of the Survey are being presented in two forms, individual industry reports and statistical studies. This Survey constitutes another in the series of statistical studies and covers data on registrants and their subsidiaries, showing the relationship to and control by parent. Included in the listing are 2,095 registrants and their 13,868 subsidiaries with the percent of control of each immediate parent as reported by registrants. A listing of the companies and subsidiaries included in this Survey will be found in the Index following the tables.

PREFACE

This Survey of "Registrants and Subsidiaries" is based on data contained in registration statements and annual reports filed by registrants under the Securities Exchange Act of 1934 and data contained in reports filed annually under the Securities Act of 1933. The tabulation includes 2,095 corporations and their 13,868 subsidiaries and/or affiliates as reported on December 31, 1945 or on the last report made by registrants prior to that date.

Of these 13,868 subsidiaries, 9,200 were consolidated and 4,668 were unconsolidated; 11,616 were active and 2,252 were inactive; 12,190 were named and 1,678 were unnamed. Of the total 2,095 registrants, 1170 were manufacturing corporations having 7,978 subsidiaries.

The tabulation as set up enables one quickly to visualize the entire organizational set-up of which any corporation is a component part when merely the name of any one subsidiary or registrant included in any group is known. Any company in which a registrant owns more than 50 percent of the voting stock is generally regarded as a subsidiary and invariably reported as such. Companies in which the registrant owns 50 percent or less of the voting stock are occasionally reported in the listing of a registrant's subsidiaries.

The information as to the corporate relationships is shown as reported by registrants. The degree of remoteness between registrant and subsidiary is indicated by the marginal indentation. All subsidiaries equally remote from the respective registrants are equally indented, with each subsidiary placed directly under the company which immediately controls it. The percentage of control is shown as reported by registrants and is generally indicated by the registrant for its ordinary voting stocks. In some instances this is qualified by a change in the status of these stocks because voting privileges have been added or denied due to dividend interruptions or other contingencies. Whenever stated by the registrant such changes have been footnoted. Whenever a company is controlled by

Dec. 23/4 1988 /Hec

two or more corporations jointly, such joint control is indicated by a similar letter in the column designated on the tables as "indicates split ownership".

In some cases the names of either domestic or foreign subsidiaries were omitted by registrants because such subsidiaries were not considered of material significance to the total enterprise represented by the registrant and its subsidiaries. The Commission also permits the registrant to omit the name of any foreign subsidiary if disclosure of the name of such subsidiary would be detrimental to the interests of the security holders of the registrant. In these cases, the information presented in the listing was necessarily limited to the number of such unnamed subsidiaries.

The "Index" which follows the tables contains the name and page number of every registrant and subsidiary included in the publication.

Definitions employed in the filing of the information presented herein are as follows:

AFFILIATE - The term "affiliate" or "affiliated", used to indicate a relationship with a particular person, refers to a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, such person.

CONTROL - The term "control" (including the terms "controlling", "controlled by", and "under common control with") means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a person, whether through ownership of voting securities, by contract or otherwise. If in any instance the existance of control is open to reasonable doubt, the registrant may state the material facts pertinent to the possible existence of control, with a disclaimer of any admission of the actual existence of effective control.

PARENT - The term "parent", used to indicate a relationship with a particular person, refers to an affiliate controlling such person directly, or indirectly through one or more intermediaries.

SUBSIDIARY - The term "subsidiary", used to indicate a relationship with a particular person, refers to an affiliate controlled by such persons directly or indirectly through one or more intermediaries.

VOTING POWER - The term "voting power" refers to the right, other than as affected by events of default, to vote, or by virtue of beneficial ownership of securities or otherwise, to direct votes, for the election of directors.

NAMES SHOWN IN CAPITAL LETTERS - Whenever a registrant included in the study is also a subsidiary or an affiliate of another registrant, its name is also shown in capital letters. However, in some cases, registrants not covered in this survey, e.g., railroads reporting to the Interstate Commerce Commission, may be shown as subsidiaries in this survey. In such a case the registrant's name is not shown in capital letters.

The work on the report was under the direction of Ralph H. Krapp, Survey Manager, with the transcription and tabulation of the data under the immediate supervision of Edward Chavin, assisted by W. Bianco, E. Cammack, T. Cortelyou, B. Finler, J. Goodman, W. Hauser, F. Hayes, J. Kriss, R. Prostkoff, I. Ruderman, J. Tepedino and C. Walsh.
